## EDUCATION

---

### Luther College

May 2026 B.A. Economics & Computer Science Honors: Davis

United World College Scholarship Recipient; Duke of Edinburgh International Award Relevant Coursework: Econometrics, Intermediate Microeconomics, Intermediate Macroeconomics, Development Economics, International Trade, Data Modeling & Querying

## EXPERIENCE

---

### Ozyberg Sicurezza Limited

Abuja, Nigeria *Incoming Head of Finance & Investment*

Jun 2026 – Present

- Lead budgeting, treasury management, cash-flow planning, and financial reporting activities.
- Develop financial models supporting contract pricing, profitability analysis, project costing, and investment evaluation.
- Support executive decision-making through forecasting, capital allocation analysis, and performance reporting.

### Finance Analysis Intern, Luther College

Sep 2025 – May 2026

- Analyzed JPMorgan purchasing-card transaction data to identify cost-saving opportunities across campus departments.
- Evaluated procurement behavior, vendor utilization, and spending patterns using quantitative analysis.
- Presented recommendations supporting purchasing efficiency and expenditure optimization initiatives.

### Network Technician, Luther College Information Technology Services

May 2025 – Aug 2025

- Analyzed operational performance metrics and identified process improvement opportunities.
- Utilized Aruba Central and HPE GreenLake to monitor system performance and infrastructure reliability.
- Produced technical documentation and operational reports supporting institutional accountability.

### Resident Assistant, Luther College

Aug 2023 – May 2026

- Managed budgets and expenditures for community programming serving 40+ residents.
- Monitored spending against approved allocations and maintained financial accountability.

## RESEARCH & PROJECTS

---

### R&D Investment and Stock Returns Analysis

- Analyzed 100 publicly traded firms using econometric models based on the Fama-French framework.
- Applied OLS regression, HC3 robust standard errors, VIF diagnostics, and specification testing.
- Evaluated relationships between R&D investment intensity, firm characteristics, and annual stock returns.

### TeamBlueLock Financial Analytics Platform

- Developed a full-stack financial analytics platform using Next.js, React, TypeScript, and MongoDB.
- Built tools for inventory valuation, cost tracking, profit-margin analysis, revenue forecasting, and financial reporting.
- Led testing efforts comprising 90 automated tests and approximately 90% code coverage.

### Personal Finance Tracker

- Designed budgeting and expense-tracking software with variance-analysis and financial reporting functionality.
- Developed dashboards for monitoring spending patterns and financial performance.
